

MuleSoft® Observability with OpenTelemetry

WHAT'S THE PROBLEM WE SOLVE?

Our solution addresses the challenge of effectively monitoring and optimizing MuleSoft applications. By leveraging Datadog and OpenTelemetry, we provide comprehensive observability that helps you:

- **Identify Issues:** Use real-time metrics to detect problems as they arise.
- **Locate Problems:** Trace requests through your system to pinpoint where issues occur.
- **Diagnose Issues:** Dig into detailed logs to understand and resolve the root cause of problems.

AVIO'S DATADOG MARKETPLACE OFFERING

AVIO's OpenTelemetry module helps MuleSoft customers ship traces, metrics, and logs to pre-built dashboards in Datadog. The solution works with Cloudhub, On-Premise, and Hybrid deployment models.

This offering is available to purchase as a Tile in the Datadog marketplace. Schedule a demo today to see how AVIO's MuleSoft Observability module works!
